

MAHESH DAHAL

AI Integration Specialist

Kathmandu, Nepal | [linkedin.com/in/maheshdahal](https://www.linkedin.com/in/maheshdahal) | github.com/wahesh | wahesh.github.io

PROFESSIONAL SUMMARY

AI Integration Specialist helping organisations adopt AI into their workflows and behaviours — ensuring they are fully ready and keeping pace with the latest technology shifts. With agentic AI, the hard-won knowledge of domain experts can be packaged into small, accessible tools the wider organisation can use. Vibe coding into the regular workplace is the future, and I work to make that transition real.

At the UN Resident Coordinator's Office in Nepal, I build real-time analytics engines, bridge UNINFO and UN agencies through browser automations, and rethink how knowledge reaches people — using ElevenLabs and Seedance to move beyond slide decks into characters, animations, and music. 13+ years across engineering, field operations, IoT, and cloud evangelism spanning 5+ countries.

EXPERIENCE

UN Resident Coordinator's Office · Nepal

AI Integration Specialist | Jun 2026 – Present | Kathmandu, Nepal

- Built a data collection platform and integrated Sentinel-1 SAR/Copernicus imagery with local flood and rainfall data to identify flood extents and estimate population-level damage for humanitarian response.
- Developed a real-time news alerting and analytics engine with keyword monitoring, sentiment trend analysis, outbreak alerts, and personalised news digests across UN agencies.
- Bridged UNINFO and UN agencies through browser automations and shared data pipelines, reducing manual coordination overhead.
- Rethought content delivery using ElevenLabs voice synthesis, Seedance, AI video, and Karaoke-style presentation to make training and information more accessible in multilingual field contexts.
- Combined Claude, Copilot, and Design Intelligence in practical daily workflows to accelerate team productivity.

ZeroTB

Growth & Operations Manager | Aug 2025 – Jun 2026 | Nepal

- Coordinated engineering and delivery, ran project management, and kept day-to-day operations and GTM motion on track for an AI-led compliance startup.
- Worked across partnerships, internal cadence, and scalability of information-services offering to unblock product and customers.
- Managed budget inputs, forecasting support, and lean ops to keep the team focused and the business measurable.

UNICEF

Assessment Specialist | Feb 2024 – Aug 2025 | Nepal

- Led a national school-readiness assessment covering 280 schools with probability-based sampling (PPS) and rigorous field protocols.
- Oversaw instrument quality (IRR, CVI), enumerator training, and analysis in Python/R — turning raw field data into defensible indicators.
- Co-authored the published report; findings fed policy dialogue and programme decisions at scale.

Logpoint

Engineering Manager | Apr 2023 – Feb 2024 | Kathmandu

- Managed engineering delivery for converged SIEM and security analytics in a global product organisation.
- Worked with product and customers on log normalisation, correlation content, and release quality under enterprise expectations.
- Mentored engineers and balanced roadmap pressure with sustainable execution and incident readiness.

Kipuwex

Software Engineering Manager | Jun 2019 – Mar 2022 | Finland

- Led a team of five shipping an IoMT product (Flutter, Node, React, AWS) with wearables streaming body data to the cloud in real time.
- Built stream analytics to catch meaningful changes in vitals, user-defined alarms and triggers, and continuous remote health monitoring.
- Maintained clear SLAs, release discipline, documentation, and hiring pipelines.

Graphene Inc.

Chief Technology Officer | Jul 2020 – Feb 2021 | Kathmandu

- Set R&D direction for an NLTK-based news aggregator with sentiment and keyword intelligence.
- Stayed hands-on on pipelines, evaluation, and product trade-offs on a short runway.

UNICEF

IT Consultant | Sep 2017 – Dec 2019 | Kathmandu

- Designed reconstruction information-management systems with the Ministry of Education and NRA after the 2015 earthquakes.
- Built dashboards, role-based access, and workflows so field and central teams could trust one source of truth.
- Coordinated adoption across government and NGO partners with training and iterative rollout.

Microsoft Innovation Center

Microsoft Azure Evangelist | Jan 2011 – Aug 2015 | Nepal

- Drove Azure adoption through workshops and hands-on labs for MSPs and ISVs — 100+ partners touched over time.
- Delivered architecture reviews and pilots for clients including AEPC and Nepal Biogas.

BrainWorks Learning Solutions

Technical Consultant | Jan 2011 – Jul 2015 | Kathmandu

- Implemented Dynamics NAV and Azure-backed solutions for health, energy, and development-sector programmes.
- Delivered Unlimited Drishtee, Urza, Sarsaaman, and Surackshya — from requirements through go-live.

EDUCATION

Executive Education, Leading for Innovation | Lee Kuan Yew School of Public Policy (NUS) | 2021

Higher Diploma, Research and Writing | The Open Institute | 2023–2024

MBA, Entrepreneurship | Westcliff University (King's College Nepal) | 2016–2018

Bachelor's, Information Technology | Sikkim Manipal University | 2011–2015

Design Thinking (DevLAB) | Oulu University of Applied Sciences | 2018

SKILLS

AI Integration, Agentic AI, Vibe Coding, LLM, ElevenLabs, Seedance, Browser Automation, Real-time Analytics, Sentiment Analysis, Outbreak Alerting, Satellite Remote Sensing, Sentinel-1 SAR, Copernicus, Geospatial Analysis, Humanitarian Analytics, UNINFO, Rapid Prototyping, IoT, IoMT, Cybersecurity, VAPT, Responsible Disclosure, Product Management, Project Management, Agile, Scrum, Operations, Partnerships, GTM, Python, JavaScript, R, React, Node.js, PHP, AWS, Microsoft Azure, Dynamics NAV, Information Management, Research

CERTIFICATIONS

Microsoft MVP | MCT (Microsoft Certified Trainer) | Azure IaaS Deep Dive | Microsoft Certified Professional | HTML5 / JavaScript / CSS3 | SQL Server | Dynamics NAV

PROJECTS

UN Agency Document Intelligence — UN RC's Office · Python · Ollama · BeautifulSoup

- Scrapes PDFs, Word, Excel, and PowerPoint files from all UN agency websites in Nepal, deduplicates, archives, and runs LLM summarisation via Ollama — turning a sprawling document landscape into a searchable knowledge base.

News Alerting & Realtime Analytics Engine — UN RC's Office · Python · NLP

- Keyword monitoring, sentiment trend analysis, outbreak alerts, and personalised news digests across UN agencies with browser automation bridging UNINFO and agency systems.

Flood Situational Awareness Dashboard — UN RC's Office · Sentinel-1 · Python · Geospatial

- Combines satellite imagery with population data to deliver real-time flood situational awareness — expert-level analysis made accessible as a small, usable tool for the wider team.

AI Content & Animation Studio — UN RC's Office · ElevenLabs · Seedance · AI Video

- Characters, animations, and music replacing traditional slide decks to change how knowledge and training content reach multilingual field teams.

AI Video Production Toolkit — Personal · Node.js · Python · Modal · RunPod · Remotion · FFmpeg

- End-to-end pipeline: voiceover (Qwen3-TTS), video generation (LTX-2.3), image generation (FLUX), talking-head animation (SadTalker), music (ACE-Step), upscaling, watermark removal — composed in Remotion, deployed on cloud GPU.

Nepal Local Government Activity Management System — PHP · JavaScript · FTP Sync · Geographic Data

- Web application for activity submissions across Nepal's local government levels with form validation, ministry and UN agency tracking, geographic drill-down, bulk import/export, and QA reporting.

Kipuwex IoMT Platform — Flutter · Node.js · React · AWS

- Wearables and gateways streaming body data to the cloud; stream analytics watching for shifts in vitals, driving alarms and triggers, and supporting continuous remote health monitoring.

Fleet GPS & Telematics — IoT → Cloud · Embedded

- End-to-end GPS tracking with live locations, fuel monitoring, remote vehicle lock, speed alarms, and fleet controls.

AI News Aggregator — Graphene Inc. · NLP · Python

- Ingest, dedupe, translate, and summarise sources with AI; sentiment scoring; keyword alerts; trend views and popularity index.

Conflict Threat Monitoring — UNDP Turkey · Telegram · OSINT

- Threat-detection workflow using Telegram and open news sources to monitor hostilities and track reported casualties for situational awareness.
-

HONORS, AWARDS & PUBLICATIONS

Microsoft MVP (2016)

MSP of the Year — Microsoft Nepal (2011)

Second Runner Up — LOCUS (NLP & voice), IOE Pulchowk (2011)

Microsoft Student Partner — Thapathali Campus (2011)

Canonical Contributor — Merged PR in charm-eng-releases (docs & grammar)

Arctic Code Vault Contributor — GitHub

Publications

School Readiness Report 2080 (Nov 2024) — 280 schools, ELDS-based tools, CVI & IRR; policy benchmarks.

Azure & SQL Technical Articles (SlideShare, 2014) — 70-533, Azure infrastructure, SQL Server mirroring.
